About Company

Uniarmour Corp, incorporated in 2016 in Houston, TX, designs and manufactures innovative thread protection solutions for the onshore and offshore oil and gas industry. Uniarmour offers products that serve the global market for OCTG, tubings, sucker rods, perforating guns in addition to large diameter API certified protectors for subsea operations. The company's high-density polyethylene and proprietary composite products are easily recyclable, improve functionality and provide cost benefits. With Manufacturing capabilities in USA and Egypt, Uniarmour is capable to meeting it's customers global demand.

Tubing Protector

UNI-SWIV

REDUCE COST & PREVENT FALLING OFF

Applications

- Innovative Tubing thread protector for PH-6 and EUE interchangeable connections.
- Outer patent pending swivel feature prevents the pin from backing off during handling.
- EUE option is fitted with a high torque feature that prevents fall off at high temperatures.
- Superior impact protection.
- Made out of highly recyclable plastic.
- Available in 2 3/8" and 2 7/8" sizes.

Benefits

- Prevents fall off
- Cost-Effective
- Solution Sealing Technology

Sucker Rod Protector

UNI-ROD

IMPROVE EFFICIENCY, RELIABILITY & SAFETY

Uniarmour's patented sucker rod thread protector provides an efficient solution for protecting sucker rod ends, with installation and removal times as low as 2 seconds. Our sucker rod protectors also minimize fall-off and eliminate safety hazards/ hammering associated with current thread protectors.

Applications

- Increased Safety
- Low Impact Installation
- Global Service
- Fits All Thread Types
- Provides Visual Indication of Proper Install
- Eliminates Fall Off

Benefits

- Enhanced Efficiency
- Eliminates Fall-Off
- Minimizes Safety Hazards

Large Diameter Protectors

UNI-TRQ LOD

API CERTIFIED. MADE IN USA. HIGH-GRADE MATERIAL

Uniarmour's large diameter protectors are suitable for casings and subsea connectors for a wide range of applications and environments.

Applications

- Ranging from 20in to 30in in diameter
- -50F to 150F operating temperature range
- Fitted with multiple anti rotation screws to prevent fall off in demanding conditions
- Available in all colors
- Made in the USA

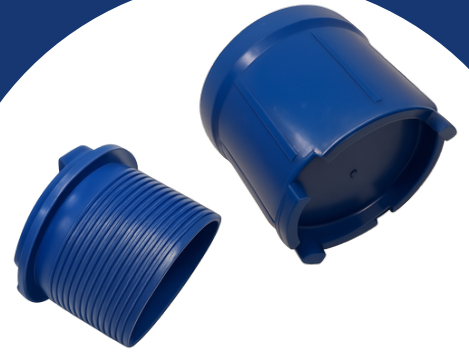

Benefits

- Cost Effecient
- Fast Delivery
- Fully Recyclable
- Prevents Fall Off

UNIARMOUR

Standard-Efficient Protectors

UNI-TRQ

CASING PROTECTOR

LOWER COST. HIGHLY RECYCLABLE. HIGH-DENSITY POLYETHYLENE.

Uniarmour has re-engineered the conventional casing protector to enhance efficiency, reliability and reduce cost. Our protectors fit buttress and buttress-compatible connections. All available at a global service.

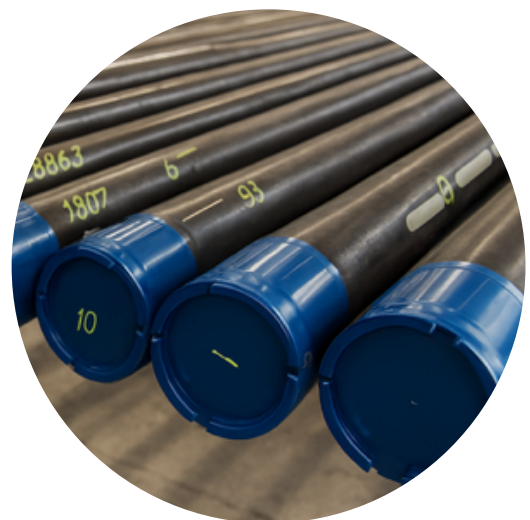

Applications

- Exceeds API Class B axial impact test (600ft-lb) at 70 deg F.
- Meets API Class A angular impact test (380ft-lb) at 70 deg F.
- Enhances applied torque with dedicated installation tools.
- Proprietary installation tools minimizes installation hazards and decreases install times.
- HDPE construction, and available in all colors.

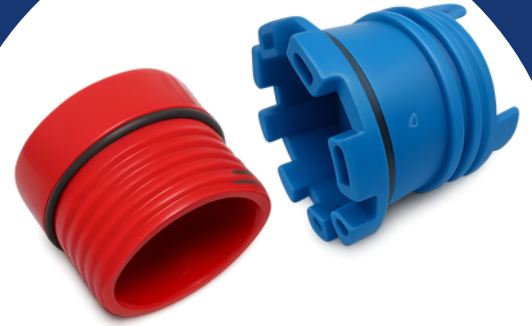

Benefits

- Direct-Hit Torque Faces
- Enhanced Reliability
- Increased Safety

Perforating Gun Protector

UNI-PERF

REDUCE COST & INCREASE EFFICIENCY

Applications

- Optimized design decreases overall cost while maintaining performance.
- Interference fit provide full plastic to metal seal.
- Impact protection.
- Tabs for optional Installation Tool for faster installation.
- Longer in length that allows for DOT sticker.
- Made out of highly recyclable HDPE.

Benefits

- Enhanced Efficiency
- Cost-Effective Solution
- Sealing Technology

UNIARMOUR

Pipe Chocks

UNI-CHK

OPTIMIZED WEIGHT. REDUCE COST

Applications

- Used for up to 16" tubulars.
- Six different nail locations for increased flexibility.
- 5-in Pipe Chock Equivalent.
- 2 nails provided / chock.
- Duplex Nails for ease of removal.
- HDPE construction ensures impact resistance and reliability
- 100% Recyclable

Benefits

- Increased installation flexibility
- Cost-Effective Solution
- Impact Resistant

Expandable Casing Patch **UNI-PATCH**

ENHANCE ID, PRESSURE RATINGS AND CONTINGENCY FOR OPTIMUM WELL INTEGRITY.

Uniarmour's multi-patent-pending casing patch system relies on pipe expansion technology to provide a wellbore integrity solution that offers the largest possible internal diameter. With a completely new design, this system expands from the top down, which offers enhanced contingencies in terms of tool removal if problems arise. With this system, wells can be fixed in one trip, as this system leaves no shoe behind for subsequent drill-out.

Applications

- Water and perforation shut-off
- Corroded / Parted casings
- Leaking collars / casing leaks
- Worn out casing repair
- Isolates leaking downhole equipment.

Benefits

- Top-down expansion offers enhanced contingencies
- Single trip system, no shoe drill out
- Higher pressure ratings
- Stackable design for longer lengths.
- Available in alloy steels and CRA's
